

FOR DISCUSSION — NOT FOR SIGN-OFF

Occurrence Book Business Requirements

Patrol Log — Wierdabrug CPF

Document	OB-BOOK-SPEC-001
Version	1.3 — discussion draft
Date	17 September 2026
Audience	Call centre, sector leads, CPF committee
Purpose	Work through section by section. Not a sign-off form. Old lists can be scrapped where the group agrees.

This is a business requirements document, not software. Every dropdown, type and report heading for the new book is listed here. If a word is wrong, missing or should be renamed, mark it on this document. We will build the system from this PDF.

Discussion draft. Crime types from Le Roux's spreadsheet (8 Sep 2026). Comments through 16 Sep 2026.

1. Discussion so far

Work through this **section by section**. Old OB lists can be scrapped. This v1.3 applies the WhatsApp thread of 8–16 September 2026 plus Le Roux’s updated type spreadsheet.

When / who	Comment	What this draft does
5 Sep — Le Roux / Hein	Alpha vs Bravo danger; many types on one incident; shorter Received from; services changes.	Kept from v1.2.
8 Sep — Le Roux	Updated crime type list is missing items. IR/OB numbers today are sequence/year e.g. 215/2026. Must each sector have its own sequence?	Type list replaced from the spreadsheet. OB number = S1/215/2026 — sector code + sequence + year. Each sector has its own sequence (Theuns).
8 Sep — Angelique, Le Roux, Niel	Attempted suicide vs suicide: starts as emergency; if it becomes P4 / death it is criminal (unnatural death, docket). Agreed: attempted = emergency, suicide = crime.	Attempted Suicide stays Emergency (055C). Suicide moves to Criminal (055). If an attempted suicide ends in death, change type to Suicide / Unnatural Death and tag Injuries - P4.
8 Sep — Niel	Some sectors still run a basic Telegram OB (address, date, incident heading, chat with screenshots). Stats are pulled by hand. They want Patrol Log OB for stats.	WhatsApp / CSV / Summary / Detail / map reports are specified from the current Sierra 1 August pack so stats are not manual.
8–9 Sep — Hein / Le Roux / Niel	Grey codes: Smash-n-Grab 016+017; Cable Theft 013+017; Dog Poisoning 017; Protest ≈ 070; disasters are not crime; fireworks = Metro by-law. Tags can mark dog poisoning etc. Sector 2 only logs emergencies if they were present. Le Roux: capture <i>all crime we know about</i> even if we were not there, as “Captured for Information Only”. Emergencies, disasters and by-law only if we were present or assisting.	Capture rule in section 3. Tags for smash-and-grab, dog poisoning, fireworks. Multiple types cover 016+017. Protest March 070 on the new list.
Hein’s photo — SAPS 100–108	108 = Robbery from Person. Also Bank Robbery 104, CIT 105, Armed Robbery – Person 107.	108 confirmed. 104–108 added. House robbery extras (013, GBH, 017) still use multi-type.
13 Sep — Le Roux / Hein / Niel	One vehicle must link to more than one patroller (Lex/Chiminay; WV17/18/42; WV19/49; WV37/38 would not save).	Related Patrol Log change: a vehicle can have several members. Not part of the OB form, but required before go-live.
16 Sep — Hein / Angelique	Patrollers cannot add or edit Residents in Patrol Log, so people put residents on the old OB.	Related Patrol Log change: patrollers can add/edit residents (same as they wanted on the OB).

2. What this document covers

The new Patrol Log system will replace the current Sierra 1 Occurrence Book for logging incidents. This BRD sets out the lists and rules so the book matches how the sector actually works.

- The **types of incident** (Criminal, Emergency, Of Interest, Other) and their SAPS-style codes
- For criminal types only: a **danger level** that tells a patroller whether to attend, or leave it to police and armed response
- Medical **patient priority** (P1–P4) — how badly the injured person is hurt, not how dangerous the scene is
- How an incident is **opened and closed** (Active / Closed, and the conclusion list)
- Who an incident can be **received from**, and which **services** can be marked on scene
- The **suburb list** for Wierdabrug / Centurion
- How **patrollers** log an incident on the phone, including while already on patrol
- How **call centre** logs a Commence Shift in the book
- How **BOLOs** are shown to patrollers
- That **photos** are kept as proof on each incident
- How **hotspots** are filled from last month's crime (not accidents), and can still be amended by admin
- How the monthly **Summary Report**, WhatsApp community post, Detail report and crime map work
- Related Patrol Log gaps: one vehicle, several patrollers; patrollers add/edit Residents

Nothing in this document is software yet. It is the business specification we will build from.

2. Contents

1. Discussion so far
2. What this document covers / contents
3. How an incident will work, OB numbers, and what we capture
4. Who does what
5. Status and conclusions (closing an incident)
6. Danger level — Alpha vs Bravo — and medical patient tags
7. Categories and all incident types
8. Crime groups used only on the Summary Report
9. Received from
10. Services on scene / reacted
11. Suburbs
12. Time of day and day of week

13. Vehicle of Interest, Person of Interest, and medical patient tags

14. Photos

15. Patrollers: log incident and respond while on patrol

16. Call centre: Commence Shift in the book

17. BOLOs — last seen where and when

18. Hotspots — last month's crime trends

19. Reports (WhatsApp, Summary, Detail, Crime map)

20. Moving old Sierra 1 records across

21. Related Patrol Log changes (vehicles, residents)

22. Radio lingo and phonetic alphabet

23. Fields on the capture form

3. How an incident will work

Every event that belongs in the book becomes one **Occurrence Book entry** (an incident).

3.1 OB / IR number — per sector, per year

Today Sierra 1 uses **sequence/year**, for example **215/2026**. Le Roux asked whether each sector has its own sequence. Yes.

Format: **{sector}/{sequence}/{year}** — example **S1/215/2026** (Theuns). WBS2 would be S2/1/2026, WBS3 would be S3/1/2026. Sequence restarts at 1 each calendar year, separately per sector. The number is assigned on first save and is not typed by the operator.

3.2 Capture — crime vs emergency

Le Roux (agreed with Sector 2's practice on emergencies):

- **Crime** — capture everything the sector knows about, even if nobody from CPF was on scene. That is how we see trends and hotspots. Those rows use conclusion **Captured for Information Only**.
- **Emergencies, natural disasters and by-law** (flood, lightning, fireworks, MVA, fire, medical) — only capture if we were present or actually assisting. If we only phoned Metro and were not needed, do not log it.

3.3 How a row is filled

1. Someone captures the incident (call centre on the admin website, or a patroller on the phone).
2. They choose the **category**, then one or more **types** (for example House Robbery *and* Theft *and* Assault GBH *and* Malicious Damage). The first type is the primary one for reports. Extra types record everything else that happened. Code **108 is Robbery from Person**.
3. For a criminal type they also mark **Alpha (A) — still active** or **Bravo (B) — already happened**. That drives the danger level (Le Roux: 023A leave to police; 023B patrollers can assist).
4. They fill in date and estimated time, where it happened, a description, who reported it, and who responded.
5. The entry stays **Active** until someone closes it.
6. To close it they must choose a **conclusion** (what the outcome was).
7. Photos can be attached as proof at any time.

What we are not changing: Commencing and standing down a patrol stays as it is today. A patrol is not the same thing as an incident. A patroller can be on patrol and then log or respond to an incident without ending the patrol.

4. Who does what

Who	What they can do
Call centre	Full capture form (same idea as Sierra 1). Optional "Commence Shift" entry in the book. See and edit all incidents for the sector. Add photos, VOI / POI / tags, close incidents.
Patroller (phone)	Log a new incident from Home or while already on patrol. Mark "Responding" to an existing active incident. See BOLOs (who / what to look for, last seen where and when). Add a "I saw this here" update. Add photos. Add and edit Residents. Work offline — it will send when signal returns.
Sector lead / Admin	Everything the call centre can do, plus maintain lists (for example add a suburb) and import the old Sierra 1 history once it has been formatted.

5. Status and conclusions

5.1 Status — only two

Status	Meaning
Active	Still open. Work is ongoing or waiting for feedback.
Closed	Finished. A conclusion has been chosen.

There is no "pending", "investigating" or "false alarm" status. If it was a false alarm or nothing was found, that is recorded in the **conclusion**, then the incident is Closed.

5.2 Conclusions — choose one when closing

These are the same outcomes used in the current Sierra 1 book. Please confirm the wording is still what you want operators to see.

#	Conclusion (exact wording)	When to use it (plain language)
1	All in Order - Nothing Found	Checked the scene or address; nothing to action.
2	Authorities notified	SAPS / Metro / other authority was informed; we are not holding the scene.
3	No feedback received	Logged, but nobody came back with an outcome.
4	Scene Handed over to Authorities	We were on scene and handed it to SAPS / Metro / Fire / EMS.
5	Scene Cleared - Patients Transported	Medical: patients taken away; scene then cleared.
6	Scene Cleared	Work at the scene is done; no patients transported.
7	Captured for Information Only	Crime we know about but were not present for (Le Roux). Also used for notes / BOLOs where nobody needs to attend.
8	Other	Does not fit the list. Explain in the action details.

6. Two different ideas — do not mix them

These are not the same thing. How badly an injured person is hurt is *not* the same as how dangerous the scene is for a patroller. We do not put a P1–P4 “urgency” on the incident type. That old number mixed those ideas together and is dropped.

6.1 Danger level — Alpha (A) vs Bravo (B)

Le Roux: the same crime is not equally dangerous when it is **still happening** as when it is **already over**.

Radio / code	Meaning	Example (Armed Robbery 023)
Alpha / A	Active — still in progress	023A — leave it to the police and armed response
Bravo / B	Already happened — scene after the fact	023B — patrollers can assist
Charlie / C	Attempted (already a separate type on the list, for example 023C Attempted Armed Robbery)	If it is still on, treat like Alpha; if it is over, treat like Bravo

So danger is **not** one fixed label on “Armed Robbery”. The operator picks the type(s) *and* whether it is Alpha or Bravo. The phone then tells the patroller what to do.

Starting rule (the group can move any row):

- **Contact / serious crime, Alpha** → Leave to police
- **Same crime, Bravo** → Caution (patrollers may assist)
- **Property crime, Alpha** → Caution (suspect may still be there)
- **Property crime, Bravo** → Respond
- **Book-only types** (fraud, DUI, recovered goods) → No response either way

Emergency, Of Interest and Other types still have no danger level.

Danger level	What the patroller must do
Leave to police	Do not attend the scene. This is for SAPS and armed response only. If you are already nearby, stay at a safe distance and observe. Do not approach armed suspects, a shooting, a hijacking, a hostage situation, or similar.
Caution	You may attend if asked or if you are already close, but treat the scene as still dangerous. Do not go in alone if suspects may still be there. Wait for backup or armed response if needed.
Respond	Normal CPF attendance. Go, check, help residents, take details and photos, and write it in the book.
No response	For the book only. No need to send a patroller unless someone specifically asks.

Danger follows the contact / property / book-only rules above. Mark any type that should move.

6.2 Medical patient priority — the injured person only

P1–P4 is used **only** as an optional tag for a person who was hurt (or for a deceased person). It is the condition of that individual, not the danger of the scene, and not “how urgent is this incident type”.

Example: an MVA can have one patient tagged P1 (critical) and another tagged P3 (walking wounded). The accident type itself has no priority and no danger level.

Patient tag	Meaning for that person
Injuries - P1	Code Red — life and death / critical
Injuries - P2	Code Yellow — hurt but not critical
Injuries - P3	Code Green — walking wounded / stable
Injuries - P4	Code Blue — deceased

7. Categories and all incident types

First choose a **category**, then one or more **types**. Operators see the name and the SAPS-style code. The list below is Le Roux's spreadsheet (8 Sep 2026), plus 107 and 108 from the SAPS 100–108 table.

The four categories: Criminal · Emergency · Of Interest · Other

7.1 Criminal types

Source: Le Roux spreadsheet 8 Sep 2026, plus SAPS 100–108 (photo). Names replace the old Sierra 1 wording (for example House Breaking, not "Breaking (House)"). Pick a **primary** type plus extras.

Example: House Robbery (103) + Theft (013) + Assault GBH (010) + Malicious Damage (017). **108 = Robbery from Person.**

Alpha / Bravo is chosen on the incident (section 6), not as a separate column here. Grey cases use extra types and tags (section 13): Smash-n-Grab = 016 + 017 + tag; Cable Theft = 013 + 017; Dog Poisoning = 017 + tag; Protest = 070 Protest March.

Type name	Code	Report group
Abduction	046	Contact crime
Animal Abuse	063	Other criminal
Armed Robbery	023	Contact crime
Armed Robbery – Person	107	Contact crime
Arson	036	Property
Assault	011	Contact crime
Assault GBH	010	Contact crime
ATM Robbery	106	Contact crime
Attempted Child Abuse	027C	Contact crime
Attempted Robbery	024C	Contact crime
Attempted Armed Robbery	023C	Contact crime
Attempted ATM Robbery	106C	Contact crime
Attempted Bank Robbery	104C	Contact crime
Attempted Business Robbery	102C	Contact crime
Attempted Cable Theft	—	Property
Attempted Car Jacking	100C	Contact crime
Attempted Cash in Transit Robbery	105C	Contact crime
Attempted Drowning	080C	Other criminal
Attempted Hi-Jacking of Truck	101C	Contact crime

Type name	Code	Report group
Attempted House Breaking	014C	Property
Attempted House Robbery	103C	Contact crime
Attempted Indecent Assault	043C	Contact crime
Attempted Malicious Damage	017C	Property
Attempted Murder	022C	Contact crime
Attempted Rape	021C	Contact crime
Attempted Shooting	019C	Contact crime
Attempted Stock Theft	—	Property
Attempted Theft of Vehicle	015C	Property
Attempted Theft out of Vehicle	016C	Property
Bank Robbery	104	Contact crime
Bomb Exploding	031	Contact crime
Bomb Threat	032	Contact crime
Business Robbery	102	Contact crime
Cable Theft	—	Property
Car Jacking	100	Contact crime
Cash in Transit Robbery	105	Contact crime
Child Abuse	027	Contact crime
Crimen Injuria	042	Other criminal
Dangerous Animal	074	Other criminal
Desecration of Grave	065	Other criminal
Disturbing the Peace	029	Other criminal
Domestic Violence	092	Contact crime
Drive under Influence	050	Other criminal
Drowning	080	Other criminal
Drunkenness	041	Other criminal
Dumping Chemicals	098	Other criminal
Escaping	045	Other criminal
Fighting	012	Contact crime
Fraud	034	Property
Gang Fighting	048	Contact crime
Gathering	056	Other criminal

Type name	Code	Report group
Hi-Jacking of Truck	101	Contact crime
Hit by Train	057	Other criminal
Hostage Situation	020	Contact crime
House Breaking	014	Property
House Robbery	103	Contact crime
Illegal Strikes	069	Other criminal
Incest	066	Contact crime
Indecent Assault	043	Contact crime
Injured Person	062	Other criminal
Interdict	073	Other criminal
Intimidation	033	Contact crime
Kidnapping	088	Contact crime
Loitering	086	Other criminal
Lost Property	082	Other criminal
Malicious Damage	017	Property
Mentally Deranged	078	Other criminal
Mentally Disturbed	064	Other criminal
Missing on Mountain	087	Other criminal
Missing Person	047	Other criminal
Murder	022	Contact crime
Pointing of Firearm	077	Contact crime
Possess/Deal in Drugs	054	Other criminal
Possession Dangerous Weapons	052	Other criminal
Possession Stolen Goods	049	Property
Protest March	070	Other criminal
Public Indecency	085	Other criminal
Rape	021	Contact crime
Rebellious Person	075	Other criminal
Recovered Property	072	Property
Riots	068	Contact crime
Robbery	024	Contact crime
Robbery from Person	108	Contact crime

Type name	Code	Report group
Shooting	019	Contact crime
Shoplifting	044	Property
Stock Theft	053	Property
Stone Throwing	030	Contact crime
Sudden Death	079	Other criminal
Suicide	055	Other criminal
Theft	013	Property
Theft of Vehicle	015	Property
Theft out of Vehicle	016	Property
Theft with Detention	058	Property
Traffic Offence	081	Other criminal
Trespassing	028	Trespassing / wall jumpers
Unnatural Death	052	Other criminal
Use Vehicle without Consent	018	Property
Wanted Person	084	Other criminal

Note: spreadsheet lists both Possession Dangerous Weapons and Unnatural Death as 052 — keep both names; confirm with Le Roux if one code is wrong. Kidnapping is 088 on the new list (was 046). Suicide is criminal (055). Attempted Suicide is emergency (055C), not in this table.

7.2 Emergency types

No danger level on the type. If someone is hurt, tag that **person** P1–P4. **Attempted Suicide (055C)** lives here. If it ends in death, change the type to Suicide (criminal 055) / Unnatural Death and tag Injuries - P4 (Angelique / Le Roux). Natural disasters (flood, lightning, sinkhole, tree) have no SAPS crime code. Only log emergencies if CPF was present or assisting.

Type name	Code
Fire (House/Building/Factory)	035
Fire (Vehicle)	035
Fire (Veld/Field/Stand)	035
Attempted Suicide	055C
Flooding	—
Lightning / storm damage	—
MBA (Motor Bike Accident)	—
Medical Emergency	—
MVA (Motor Vehicle Accident)	—

Type name	Code
PVA (Pedestrian Vehicle Accident)	—
Sinkhole	—
Tree Fallen Over	—
Other	—

Emergencies do not create crime hotspots. They are counted under Emergencies on the Summary Report (August 2026: 14 emergencies vs 42 criminal).

7.3 Of Interest types

Type name	What it is for
Vehicle of Interest	Suspect / watched vehicle (VOI). BOLO list.
Person of Interest	Suspect / watched person (POI). BOLO list.
Place of Interest	Address or landmark to watch.

7.4 Other types

Type name	What it is for
Note	Information only.
BOLO	Be On the Look Out.
Drive by Request	Asked to drive past an address.
Open Gate	Open / unsecured gate.
Metro By-Law (e.g. fireworks)	Only if CPF was present or assisting. Hein: fireworks as Metro by-law. Sector 2 calls Metro and does not count it if they were not needed.
Commence Shift	Call centre optional book entry.

8. Crime groups — Summary Report only

This is **not** an extra field when logging. The operator still just picks the type (for example "Armed Robbery"). When the monthly Summary Report is printed or copied for WhatsApp, every *Criminal* incident is counted under one of these four headings — the same idea as the current Sierra 1 Summary Report.

Report heading	Which types fall under it
Contact crime and other serious crime	Abduction; Armed Robbery and Armed Robbery – Person (107); ATM / Bank / Business / House Robbery and attempts; Assault and Assault GBH; Car Jacking and Hi-Jacking of Truck and attempts; Cash in Transit; Child Abuse and attempts; Domestic Violence; Fighting / Gang Fighting; Hostage; Kidnapping; Murder and Attempted Murder; Pointing of Firearm; Rape and Attempted Rape; Riots; Robbery and Robbery from Person (108); Shooting and Attempted Shooting; Indecent Assault and attempts; Intimidation; Bomb Exploding / Threat; Stone Throwing.
Property crime	House Breaking and Attempted House Breaking; Theft, Theft of Vehicle, Theft out of Vehicle, Theft with Detention and attempts; Cable Theft and attempts; Arson; Malicious Damage and attempts; Shoplifting; Fraud; Stock Theft and attempts; Recovered Property; Possession Stolen Goods; Use Vehicle without Consent.
Trespassing / wall jumpers	Trespassing (028). Tag Wall Jumper when that is how they entered. Kept as its own report heading because it is high-volume in this sector (August 2026 WhatsApp list: many Valhalla wall-jumper rows).
Other criminal	Animal Abuse; Crimen Injuria; Dangerous Animal; Disturbing the Peace; Drive under Influence; Drunkenness; Drowning and attempts; Escaping; Gathering; Protest March (070); Illegal Strikes; Loitering; Lost Property; Mentally Deranged / Disturbed; Missing Person / Missing on Mountain; Possess/Deal in Drugs; Possession Dangerous Weapons; Public Indecency; Rebellious Person; Suicide (055); Sudden Death; Unnatural Death; Traffic Offence; Wanted Person; and similar book types. Rape and Suicide are criminal for the book, but they are left off the WhatsApp community post (section 19).

The top of the Summary Report will still show the simple totals: all incidents, Criminal, Emergencies, Vehicles/People of Interest, Other.

9. Received from

Le Roux: we do not need the old eight-item list. Tick one or more of these only. Put anything else back if the group still uses it.

#	Exact wording
1	Emergency Number
2	CPF Group
3	Other Groups
4	CPF Member / Patroller

#	Exact wording
5	Other

On the phone, if a patroller logs the incident themselves, this will default to **CPF Member / Patroller**.

Dropped from the old book unless someone asks to keep them: Emergency Phone (replaced by Emergency Number), Centurion OPS, ACPAT Group, CPF NW Group, Other CPF Group, Other W/T Group.

10. Services on scene / reacted

Le Roux: update security companies; for CPF pick the actual members who are out; ambulance only Private and State; the rest can stay.

#	Service	How it is captured	Reference number
1	CPF patrollers	Multi-select from members currently on patrol in Patrol Log (not a single "CPF S1 Patrollers" tick box). You pick the call signs who reacted.	—
2	SA Police Services	Tick	SAPS Reference
3	Tshwane Metro Police	Tick	Metro Police Reference
4	Security companies	Multi-select from an admin-maintained list . The old ADT / Aequitas / Brincor / Cop Watch / CounterPoint / Monitor Net / Scorpion / Other tick boxes are dropped until the sector gives the current companies.	—
5	Ambulance (Private)	Tick	Ambulance Reference
6	Ambulance (State)	Tick	Ambulance Reference
7	CERT	Tick	—
8	Paramedic	Tick	Ambulance Reference
9	Fire Brigade	Tick	Fire Brigade Reference
10	Trauma Counseling	Tick	—
11	City of Tshwane	Tick	—
12	Other	Tick + name in details	—

Dropped unless the group wants them back: Ambulance (Aequitas) as its own line; the old fixed security-company names. Admin will load the current security companies before go-live.

11. Suburbs

Choose one suburb per incident. Admin can add a new suburb if a name is missing (same "+" idea as Sierra 1). Known alternative spellings are shown so both "Lyttelton" and "Lyttleton" still match.

#	Suburb name	Also accept
1	Clubview	
2	Hennopspark	
3	Valhalla	Monrich
4	Wierdapark	
5	Bronberrick	
6	Lyttelton	Lyttleton
7	Eldoglen	
8	Eldoraigue	
9	Heuweloord	
10	Centurion Central	Centurion
11	Rooihuiskraal	
12	The Reeds	
13	Cranbrook Vale	
14	Zwartkop	
15	Die Hoewes	
16	Raslouw	
17	Sunderland Ridge	
18	Highveld	
19	Southdowns	
20	Celtis Ridge	
21	Monrick	
22	Glen Lauriston	
23	Laudium	

Street is free text: **Street number and name / complex**, as today.

12. Time of day and day of week

These are calculated from the incident date and estimated time. Nobody types them. They appear on the OB list and on reports.

Time of day label	Hours
During the Night	00:00 – 04:00
Early Morning	04:00 – 08:00
Morning	08:00 – 12:00
Afternoon	12:00 – 16:00
Late Afternoon	16:00 – 18:00
Evening	18:00 – 22:00
Late Evening	22:00 – 24:00

Day of week is the normal week: Monday through Sunday.

13. Vehicle of Interest, Person of Interest, and medical patient tags

Call centre / admin fill these in on the full form. Patrollers **see** them on the phone so they know what to look for.

13.1 Vehicle of Interest fields

Field	How it is captured
Colour	Choose from: Black, White, Silver, Grey, Red, Blue, Green, Yellow, Orange, Brown, Gold, Maroon, Other
Shape	Choose from: Sedan, Hatchback, SUV / 4x4, Bakkie / Truck, Van / Minibus, Motorcycle, Bus, Other
Make	Typed (for example Toyota). Previous makes can be reused.
Model	Typed (for example Hilux).
Registration	Typed in capitals.
Distinguishing features	Free text (canopy, smash-and-grab film, spare wheel, and so on).

13.2 Person of Interest fields

Field	How it is captured
Gender	Male · Female · Unknown
Clothing description	Free text
Direction of travel	Free text (for example "south on Ben Viljoen")

13.3 Tags (optional extra flags)

The injury tags describe **the person**, not the incident type and not the danger of the scene. You can have more than one injured person with different tags on the same accident.

Tag	Meaning
Injuries - P1	That person: Code Red — critical / life and death
Injuries - P2	That person: Code Yellow — hurt but not critical
Injuries - P3	That person: Code Green — walking wounded / stable
Injuries - P4	That person: Code Blue — deceased
Remote Jamming	Remote / key jamming suspected
Gate Motor	Gate motor involved
Cable Theft	Flag even if the main type is something else
Beams	Beams triggered / damaged
Bicycle	Bicycle involved
Wall Jumper	Trespassing by jumping a wall / fence (high volume — also a crime-group heading)
Smash-n-Grab	Use with Theft out of Vehicle (016) + Malicious Damage (017). SAPS grey area (Hein / Le Roux).
Dog Poisoning	Use with Malicious Damage (017). Not its own SAPS code.
Fireworks	Metro by-law. Only log if CPF was present or assisting.
Information only	Shortcut flag that this crime row was not attended (pairs with conclusion Captured for Information Only).

Le Roux: tags are how we mark grey cases (dog poisoning, smash-and-grab) without inventing extra SAPS codes.

14. Photos

Each incident can have one or more photos. This is required as **proof** (scene, vehicle, open gate, injuries context, and so on).

- Call centre and patrollers can both add photos.
- Photos stay with that OB number and are not public on the internet.
- They are stored securely (Cloudflare R2). The free allowance is large enough for normal sector use (about 10 GB per month included).

15. Patrollers — log and respond while on patrol

A patroller must be able to put something in the book without first going back to the office, and without standing down.

15.1 Log a new incident

From Home, or from the live patrol screen. Typical examples: they come across an **open gate**, or they walk into a house breaking while already patrolling.

On the phone they fill in a short form: type, time (defaults to now), suburb, street (GPS can help), description, photos. "Received from" defaults to CPF Patroller. Their call sign and sector are filled in automatically.

15.2 Respond to an incident that is already open

If the call centre (or another member) already logged it, the patroller can tap **Responding** and choose that active incident. If the danger for the chosen Alpha/Bravo is **Leave to police** (for example 023A), the phone must warn them not to approach — that incident is for SAPS and armed response. On 023B they may assist with caution.

- The patrol does **not** end.
- The live map will show that unit as **Responding** (this patrol type already exists when starting a patrol; now they can switch to it mid-shift).
- When they are done they **resume** the original patrol type (foot, vehicle, and so on).

They can also start a patrol already as Responding, but they must then link or create the incident.

16. Call centre — Commence Shift in the book

In Sierra 1, "Commence Shift" is often written as a row in the OB Book. In Patrol Log, commencing a *patrol* is already a separate action for patrollers.

For a member whose role is **call centre agent**, there will be an optional button: **Log Commence Shift**. That creates one Other / Commence Shift entry (sector, call sign, time). It is not created automatically when a patroller starts a patrol.

17. BOLOs — last seen where and when

When admin or call centre captures a BOLO, Vehicle of Interest or Person of Interest, patrollers must be able to look it up on the phone.

Each item on that list shows:

- What to look for (type, description, vehicle and/or person details)
- **Where last seen** (suburb and street)
- **When last seen** (date and time)

- Photos if any

If a patroller sees that vehicle or person, they can add a short “seen here now” update. That becomes the new last-seen place and time for everyone else.

18. Hotspots — last month’s crime trends

The live map already has admin-drawn hotspot circles. Those will stay, but they will also be **filled from the book**.

- The system looks at **criminal incidents only** from the last month (for example armed robbery, house breaking, theft, wall jumpers). Accidents, fire, medical and other emergencies do **not** create hotspots.
- Where several crimes cluster in the same area, a hotspot is suggested or updated so patrollers can see last month’s trend.
- Admin can still **amend** every hotspot: add one, move it, change the size or rating, or delete it if the trend is wrong or outdated.
- A hotspot that admin has edited by hand is not blindly overwritten. The trend is shown; a person decides whether to keep the change.

In short: hotspots follow last month’s *crime* pattern, not accidents, and a person can always correct the map.

19. Reports

Sectors still on Telegram pull stats by hand. The new book must print and copy the same reports Sierra 1 already posts, so stats are not manual. Source examples: August 2026 WhatsApp summary (42 crime rows posted), Sierra 1 Summary PDF (56 incidents: 42 criminal, 14 emergencies), and the Detail incidents PDF.

19.1 WhatsApp community summary

Posted to CPF community groups. **Crime incidents only.** Exclude rape and suicide. Strip street numbers (road / suburb only). Filter by date range.

Heading example:

*Wierdabrug Sector 1
Crime Incidents Summary Report
(1 - 31 August 2026)*

Each row:

- Date and time (24-hour)
- Suburb — Type (code) — street name only (no house number). Extra tag in the heading if used, e.g. Wall Jumper
- Day of week — Time of day band (e.g. Saturday - Afternoon (12:00 - 16:00))

August example: " ▲ Valhalla - Armed Robbery (023B) - Myrdal Rd" then " 🕒 Saturday - Afternoon (12:00 - 16:00)". Alpha/Bravo letter stays on the code when it was captured (023B).

19.2 Summary Report (PDF / print)

Same idea as the current Sierra 1 Summary: date range, sector name, totals at the top, then the four crime groups with counts, then Emergencies / Of Interest / Other as category totals only (not mixed into the four crime buckets). August 2026 pack: 56 incidents, 42 criminal, 14 emergencies.

19.3 Detail Incidents Report

One page or block per incident for the chosen date range: OB number, date/time, suburb, street, types, Alpha/Bravo, description, action taken, services, conclusion. Used internally — not posted to community groups (street numbers stay on this report).

19.4 Crime map

Pins on the sector map (Valhalla / Clubview / Hennospark pattern as in the current map). Filters:

Filter	Example
Date range	1–31 August 2026
Suburb	Valhalla
OB number	S1/215/2026

Filter	Example
Category	Criminal
Type	Armed Robbery
Crime group	Contact crime
Day of week	Mondays
Time of day	During the night (00:00 - 04:00)
Estimated time	Exact captured time
Tags	Wall Jumper, Smash-n-Grab, Cable Theft

Hotspots still follow section 18 (last month's crime only, admin can amend).

20. Moving old Sierra 1 records across

There are several thousand existing book entries. They will be brought into the new system after they have been formatted to match this document (same type names, same conclusions, same suburbs).

- Old OB numbers will be kept where possible so history stays searchable.
- Photos from the old system can be attached later if they are available as files.
- We will not guess at types that no longer exist. Anything that does not match this list will be flagged for a person to fix before import.

21. Related Patrol Log changes (not on the OB form)

These are already in Patrol Log, not new OB fields. People are using the old OB for them, so they must be fixed before the new book goes live.

21.1 One vehicle, several patrollers

Le Roux (13 Sep): Lex sometimes drives the car, sometimes Chiminay — they do not always ride together. Niel: other sectors do the same. Hein: WV17, WV18 and WV42 share one vehicle; WV19 and WV49 share; WV37 and WV38 could not be saved together on the current system.

Change: a vehicle can be linked to more than one patroller. On a given patrol you still pick who is in that car tonight.

21.2 Patrollers add and edit Residents

Hein (16 Sep): as a patroller he could not add or edit Residents, so Nicolette and Wesma put residents on the old OB. Angelique had the same problem.

Change: patrollers can add and edit Residents in Patrol Log (same details they were writing on the OB). Admin still sees everything.

22. Radio lingo and phonetic alphabet

This is a shared reference for wording in descriptions and radio. It is not a dropdown in the system (except where the same words already appear as types, for example BOLO, MVA, MBA, PVA).

Term	Meaning
BOLO	Be On the Look Out
MVA	Motor Vehicle Accident
MBA	Motorbike Accident
PVA	Pedestrian Vehicle Accident
S1	Sierra 1 (WBS1 call centre)
ETA	Estimated time of arrival
COS	Contact on Scene
SB	Standby (get back to you)
EMS	Emergency Services
Ambo / Bus	Ambulance
SAPS	SA Police Service
TMPD / Metro	Tshwane Metro Police
COT	City of Tshwane services

Term	Meaning
SC / PSC	Private security company
POI	Person of Interest
VOI	Vehicle of Interest
Reg	Vehicle registration
Sitrep	Situation report
Copy	Message received
Mobile / En route	On the way
On Scene	Arrived at the scene
Standing Down	Leaving scene / stopping patrol

Phonetic alphabet — NATO for the system

Radio in Patrol Log uses the current NATO / ICAO alphabet. Hein shared the 1954 Weermagswordeboek alphabet (Able, Baker, Charlie, Dog, Easy, Fox, George, How, Item, Jig, King, Love, Mike, Nan, Oboe, Peter, Queen, Roger, Sugar, Tare, Uncle, Victor, William, X-ray, Yoke, Zebra). Niel still hears “S for Sugar” and “N for Nellie” on the air; he was taught Mamba instead of Mike. That list is for training and history only — it is not the system default.

NATO (default): A Alpha · B Bravo · C Charlie · D Delta · E Echo · F Foxtrot · G Golf · H Hotel · I India · J Juliet · K Kilo · L Lima · M Mike · N November · O Oscar · P Papa · Q Quebec · R Romeo · S Sierra · T Tango · U Uniform · V Victor · W Whiskey · X X-ray · Y Yankee · Z Zulu

Alpha and Bravo on an incident still mean active vs already happened (section 6), not the letters of someone’s call sign.

23. Fields on the capture form (checklist)

This is the full form the call centre will see. Patrollers see a shorter version of the same fields.

Section	Fields	Phone (patroller)
Header	OB number (given on save), Status, Sector, Call sign	Filled automatically
Incident	Category, one or more types (primary + extra), Alpha or Bravo, date, hour and minutes, Received from (short list)	Yes. Danger level from Alpha/Bravo. Warn on Leave to police.
Location	Suburb, Street no. & name / complex, map pin	Yes (GPS can help)
Description	Description / summary	Yes
VOI / POI / tags	Vehicle and person details; medical patient tags if someone was hurt	View on BOLO list; injury tags if they logged a medical / accident
Action taken	CPF members on patrol (multi-select), security companies (admin list), ambulance Private/State, SAPS / Metro / Fire / others, details and references	Optional

Section	Fields	Phone (patroller)
Photos	One or more photos	Yes
Close	Conclusion (required to close)	Optional if they close on scene

Document control: this PDF is the business specification for discussion. Later list changes (new suburb, new security company) can be done in admin without a new PDF, unless a type is added or renamed, or a danger rule is changed.
