

FOR DISCUSSION — NOT FOR SIGN-OFF

Occurrence Book Business Requirements

Patrol Log — Wierdabrug CPF

Document	OB-BOOK-SPEC-001
Version	1.1 — BRD
Date	5 September 2026
Audience	Call centre, sector leads, CPF committee
Purpose	Discussion draft of lists, wording and rules. Not a sign-off form.

This is a business requirements document, not software. Every dropdown, type and report heading for the new book is listed here. If a word is wrong, missing or should be renamed, mark it on this document. We will build the system from this PDF.

Based on the current Sierra 1 Occurrence Book, with mobile capture for patrollers.

1. What this document covers

The new Patrol Log system will replace the current Sierra 1 Occurrence Book for logging incidents. This BRD sets out the lists and rules so the book matches how the sector actually works.

- The **types of incident** (Criminal, Emergency, Of Interest, Other) and their SAPS-style codes
- For criminal types only: a **danger level** that tells a patroller whether to attend, or leave it to police and armed response
- Medical **patient priority** (P1–P4) — how badly the injured person is hurt, not how dangerous the scene is
- How an incident is **opened and closed** (Active / Closed, and the conclusion list)
- Who an incident can be **received from**, and which **services** can be marked on scene
- The **suburb list** for Wierdabrug / Centurion
- How **patrollers** log an incident on the phone, including while already on patrol
- How **call centre** logs a Commence Shift in the book
- How **BOLOs** are shown to patrollers
- That **photos** are kept as proof on each incident
- How **hotspots** are filled from last month's crime (not accidents), and can still be amended by admin
- How the monthly **Summary Report** groups criminal incidents

Nothing in this document is software yet. It is the business specification we will build from.

2. Contents

3. How an incident will work (plain language)
4. Who does what
5. Status and conclusions (closing an incident)
6. Danger level (should the patroller attend?) and medical patient priority
7. Categories and all incident types
8. Crime groups used only on the Summary Report
9. Received from
10. Services on scene / reacted
11. Suburbs
12. Time of day and day of week
13. Vehicle of Interest, Person of Interest, and medical patient tags
14. Photos

15. Patrollers: log incident and respond while on patrol

16. Call centre: Commence Shift in the book

17. BOLOs — last seen where and when

18. Hotspots — last month's crime trends

19. Moving old Sierra 1 records across

20. Radio lingo and phonetic alphabet (reference)

21. Fields on the capture form

3. How an incident will work

Every event that belongs in the book becomes one **Occurrence Book entry** (an incident). The system gives it an OB number when it is first saved, in the same style as today, for example **719/2026** (next number / year).

1. Someone captures the incident (call centre on the admin website, or a patroller on the phone).
2. They choose the **category**, then the **type** (for example Criminal → Armed Robbery). If it is a criminal type, the **danger level** appears automatically (leave to police, caution, respond, or no response).
3. They fill in date and estimated time, where it happened, a description, who reported it, and who responded.
4. The entry stays **Active** until someone closes it.
5. To close it they must choose a **conclusion** (what the outcome was).
6. Photos can be attached as proof at any time.

What we are not changing: Commencing and standing down a patrol stays as it is today. A patrol is not the same thing as an incident. A patroller can be on patrol and then log or respond to an incident without ending the patrol.

4. Who does what

Who	What they can do
Call centre	Full capture form (same idea as Sierra 1). Optional "Commence Shift" entry in the book. See and edit all incidents for the sector. Add photos, VOI / POI / tags, close incidents.
Patroller (phone)	Log a new incident from Home or while already on patrol. Mark "Responding" to an existing active incident. See BOLOs (who / what to look for, last seen where and when). Add a "I saw this here" update. Add photos. Work offline — it will send when signal returns.
Sector lead / Admin	Everything the call centre can do, plus maintain lists (for example add a suburb) and import the old Sierra 1 history once it has been formatted.

5. Status and conclusions

5.1 Status — only two

Status	Meaning
Active	Still open. Work is ongoing or waiting for feedback.
Closed	Finished. A conclusion has been chosen.

There is no "pending", "investigating" or "false alarm" status. If it was a false alarm or nothing was found, that is recorded in the **conclusion**, then the incident is Closed.

5.2 Conclusions — choose one when closing

These are the same outcomes used in the current Sierra 1 book. Please confirm the wording is still what you want operators to see.

#	Conclusion (exact wording)	When to use it (plain language)
1	All in Order - Nothing Found	Checked the scene or address; nothing to action.
2	Authorities notified	SAPS / Metro / other authority was informed; we are not holding the scene.
3	No feedback received	Logged, but nobody came back with an outcome.
4	Scene Handed over to Authorities	We were on scene and handed it to SAPS / Metro / Fire / EMS.
5	Scene Cleared - Patients Transported	Medical: patients taken away; scene then cleared.
6	Scene Cleared	Work at the scene is done; no patients transported.
7	Captured for Information Only	For the record / BOLO / note — no response needed.
8	Other	Does not fit the list. Explain in the action details.

6. Two different ideas — do not mix them

These are not the same thing. How badly an injured person is hurt is *not* the same as how dangerous the scene is for a patroller. We do not put a P1–P4 “urgency” on the incident type. That old number mixed those ideas together and is dropped.

6.1 Danger level — should the patroller attend? (Criminal types only)

Every **criminal** type has a danger level. This is the important one for dispatch. It tells the patroller whether they must go, go carefully, or stay away and leave it to the police and armed response.

Emergency types (accidents, fire, medical) do **not** get a danger level. Of Interest and Other types do not either. Those are logged for the book; attendance is decided at the time, not baked into the type.

Danger level	What the patroller must do
Leave to police	Do not attend the scene. This is for SAPS and armed response only. If you are already nearby, stay at a safe distance and observe. Do not approach armed suspects, a shooting, a hijacking, a hostage situation, or similar.
Caution	You may attend if asked or if you are already close, but treat the scene as still dangerous. Do not go in alone if suspects may still be there. Wait for backup or armed response if needed.
Respond	Normal CPF attendance. Go, check, help residents, take details and photos, and write it in the book.
No response	For the book only. No need to send a patroller unless someone specifically asks.

The starting assignments for each criminal type are in section 7.1. Mark any type that should move to a different danger level.

6.2 Medical patient priority — the injured person only

P1–P4 is used **only** as an optional tag for a person who was hurt (or for a deceased person). It is the condition of that individual, not the danger of the scene, and not “how urgent is this incident type”.

Example: an MVA can have one patient tagged P1 (critical) and another tagged P3 (walking wounded). The accident type itself has no priority and no danger level.

Patient tag	Meaning for that person
Injuries - P1	Code Red — life and death / critical
Injuries - P2	Code Yellow — hurt but not critical
Injuries - P3	Code Green — walking wounded / stable
Injuries - P4	Code Blue — deceased

7. Categories and all incident types

First choose a **category**, then a **type**. The type list is the current Sierra 1 / sector list (including SAPS-style codes where they exist). The System ID is only for building and importing — operators will see the name and code.

The four categories: Criminal · Emergency · Of Interest · Other

7.1 Criminal types

System ID	Type name	Code	Danger level	Summary Report group
1	Armed Robbery	023B	Leave to police	Contact crime
2	Armed Robbery/Murder	023B/022B	Leave to police	Contact crime
3	Assault	011B	Respond	Contact crime
4	Assault GBH	010B	Caution	Contact crime
5	ATM Robbery	106B	Leave to police	Contact crime
6	Attempted Armed Robbery	023C	Leave to police	Contact crime
7	Attempted Business Breaking	—	Respond	Property
8	Attempted Business Robbery	102C	Caution	Contact crime
9	Attempted Cable Theft	—	Respond	Property
10	Attempted Car Jacking	100C	Leave to police	Contact crime
12	Attempted House Breaking	014C	Respond	Property
13	Attempted Kidnapping	046C	Leave to police	Contact crime
14	Attempted Motor Vehicle Theft	—	Respond	Property
15	Attempted Murder	022C	Leave to police	Contact crime
16	Attempted Rape	021C	Leave to police	Contact crime
17	Attempted Robbery	024C	Caution	Contact crime
19	Attempted Theft	013C	Respond	Property
20	Attempted Truck Jacking	101C	Leave to police	Contact crime
22	Breaking (Business)	014B	Respond	Property
23	Breaking (House)	014B	Respond	Property
24	Breaking (School)	014B	Respond	Property
25	Cable Theft	—	Respond	Property
26	Car Jacking	100B	Leave to police	Contact crime
27	CIT (Cash in Transit)	—	Leave to police	Contact crime

System ID	Type name	Code	Danger level	Summary Report group
28	Common Robbery	024B	Caution	Contact crime
29	Crimen Injuria	042	No response	Other criminal
34	Domestic Violence	092B	Caution	Contact crime
35	Driving Under The Influence	050B	No response	Other criminal
37	Fight	012B	Caution	Contact crime
41	Firearm Offence	—	Leave to police	Contact crime
42	Fraud	—	No response	Property
45	Hit and Run	—	Respond	Other criminal
48	Hostage Situation	020B	Leave to police	Contact crime
49	Illegal Gathering	—	Caution	Other criminal
51	Intimidation	033	Caution	Contact crime
52	Kidnapping	046B	Leave to police	Contact crime
53	Malicious Damage	017B	Respond	Property
54	Missing Person	091B	Respond	Other criminal
55	Murder	022B	Leave to police	Contact crime
56	Pointing of Firearm	077B	Leave to police	Contact crime
57	Possession of Drugs	054B	No response	Other criminal
58	Possession of Suspected Stolen Goods	049B	Respond	Other criminal
59	Prostitution	—	No response	Other criminal
60	Public Drinking	—	Respond	Other criminal
61	Public Indecency	085B	Respond	Other criminal
62	Rape	021B	Leave to police	Contact crime
65	Robbery	024B	Caution	Contact crime
66	Robbery (Business)	102B	Caution	Contact crime
67	Robbery (House)	103B	Caution	Contact crime
68	Robbery (School)	102B	Caution	Contact crime
69	Shooting Incident	019B	Leave to police	Contact crime
70	Shoplifting - Suspect in Detention	058B	Respond	Property
71	Shoplifting - Without Suspect	044B	No response	Property
72	Stock Theft	—	Respond	Property
73	Stolen Goods Recovered	072B	No response	Property
74	Theft (Common)	013B	Respond	Property

System ID	Type name	Code	Danger level	Summary Report group
76	Theft of Motor Vehicle	015B	Respond	Property
77	Theft of Motorcycle	015B	Respond	Property
80	Theft out of Motor Vehicle	016B	Respond	Property
81	Trespassing - Wall Jumper	028B	Respond	Trespassing / wall jumpers
82	Truck Hijacking	100	Leave to police	Contact crime
84	Unnatural Death	052	Leave to police	Other criminal
85	Use of Vehicle without Permission	018B	Respond	Property
87	Disturbance of the Peace	029	Respond	Other criminal
88	Indecent Assault	043	Caution	Contact crime
89	Drunkenness	041	Respond	Other criminal

System IDs keep the original Sierra 1 numbers so old records can be imported. Gaps (11, 18, 21, and so on) are types that were already removed from the live list — we will not invent replacements. Danger levels are a starting proposal — mark any type that should move.

7.2 Emergency types

No danger level and no P1–P4 on the type. If someone was hurt, tag **that person** with a medical patient priority (section 6.2). The scene itself is not given a type priority.

System ID	Type name	Code
99	Fire (House/Building/Factory)	035B
100	Fire (Vehicle)	035B
101	Fire (Veld/Field/Stand)	035B
102	MBA (Motor Bike Accident)	—
103	MVA (Motor Vehicle Accident)	—
104	PVA (Pedestrian Vehicle Accident)	—
105	Medical Emergency	Medical
106	Attempted Suicide	55C
107	Suicide	55B
201	Flooding	—
202	Sinkhole	—
203	Tree fallen over	—
211	Other	—

Emergency types are counted under “Emergencies” on the Summary Report. They are not put into the four crime groups and they do **not** create hotspots.

7.3 Of Interest types

No danger level and no P1–P4 on the type. These feed the BOLO list so patrollers know what to look for.

System ID	Type name	What it is for
198	Vehicle of Interest	Suspect / watched vehicle (VOI). Shown to patrollers on the BOLO list.
199	Person of Interest	Suspect / watched person (POI). Shown on the BOLO list.
200	Place of Interest	Address or landmark to watch.

7.4 Other types

No danger level and no P1–P4 on the type.

System ID	Type name	What it is for
204	BOLO	Be On the Look Out. Patrollers see this on the phone with last-seen details.
205	Note	Information only.
206	Drive by Request	Asked to drive past an address.
207	Open Gate	Open / unsecured gate found (often while already on patrol).
210	Commence Shift	Call centre only — optional book entry when the shift starts. Not created automatically when a patroller commences patrol.

8. Crime groups — Summary Report only

This is **not** an extra field when logging. The operator still just picks the type (for example "Armed Robbery"). When the monthly Summary Report is printed or copied for WhatsApp, every *Criminal* incident is counted under one of these four headings — the same idea as the current Sierra 1 Summary Report.

Report heading	Which types fall under it
Contact crime and other serious crime	Armed / common / business / house / school robbery and attempts; assault and assault GBH; ATM robbery; car and truck jacking and attempts; CIT; domestic violence; fight; firearm offence and pointing of firearm; hostage; kidnapping and attempts; murder and attempted murder; rape and attempted rape; shooting; indecent assault; intimidation.
Property crime	House / business / school breaking and attempts; theft (common, vehicle, motorcycle, out of vehicle) and attempts; cable theft and attempts; malicious damage; shoplifting; fraud; stock theft; stolen goods recovered; use of vehicle without permission.
Trespassing / wall jumpers	Only: Trespassing - Wall Jumper. Kept separate because it is a high-volume type for this sector.
Other criminal	Crimen injuria; DUI; drunkenness; disturbance of the peace; illegal gathering; missing person; possession of drugs; possession of suspected stolen goods; prostitution; public drinking; public indecency; unnatural death; hit and run.

The top of the Summary Report will still show the simple totals: all incidents, Criminal, Emergencies, Vehicles/People of Interest, Other.

9. Received from

Tick one or more. This answers: "How did we hear about it?"

#	Exact wording
1	Emergency Phone
2	Centurion OPS
3	ACPAT Group
4	CPF Patroller
5	CPF NW Group
6	Other CPF Group
7	Other W/T Group
8	Other

On the phone, if a patroller logs the incident themselves, this will default to **CPF Patroller**.

10. Services on scene / reacted

Tick everyone who responded or was on scene. This is a checklist on the incident — it is separate from the emergency contacts directory (the phone numbers).

#	Exact wording	Reference number field (if ticked)
1	CPF S1 Patrollers	—
2	SA Police Services	SAPS Reference
3	Tshwane Metro Police	Metro Police Reference
4	Security - ADT	—
5	Security - Aequitas	—
6	Security - Brincor	—
7	Security - Cop Watch	—
8	Security - CounterPoint	—
9	Security - Monitor Net	—
10	Security - Scorpion	—
11	Security - Other	—
12	Ambulance (Aequitas)	Ambulance Reference
13	Ambulance (Private)	Ambulance Reference
14	Ambulance (State)	Ambulance Reference
15	CERT	—
16	Paramedic	Ambulance Reference
17	Fire Brigade	Fire Brigade Reference
18	Trauma Counseling	—
19	City of Tshwane	—
20	Other	—

Admin can add or rename security companies later if the sector's partners change. Please confirm this starting list is correct for Wierdabrug Sector 1.

11. Suburbs

Choose one suburb per incident. Admin can add a new suburb if a name is missing (same "+" idea as Sierra 1). Known alternative spellings are shown so both "Lyttelton" and "Lyttleton" still match.

#	Suburb name	Also accept
1	Clubview	
2	Hennopspark	
3	Valhalla	Monrich
4	Wierdapark	
5	Bronberrick	
6	Lyttelton	Lyttleton
7	Eldoglen	
8	Eldoraigue	
9	Heuweloord	
10	Centurion Central	Centurion
11	Rooihuiskraal	
12	The Reeds	
13	Cranbrook Vale	
14	Zwartkop	
15	Die Hoewes	
16	Raslouw	
17	Sunderland Ridge	
18	Highveld	
19	Southdowns	
20	Celtis Ridge	
21	Monrick	
22	Glen Lauriston	
23	Laudium	

Street is free text: **Street number and name / complex**, as today.

12. Time of day and day of week

These are calculated from the incident date and estimated time. Nobody types them. They appear on the OB list and on reports.

Time of day label	Hours
During the Night	00:00 – 04:00
Early Morning	04:00 – 08:00
Morning	08:00 – 12:00
Afternoon	12:00 – 16:00
Late Afternoon	16:00 – 18:00
Evening	18:00 – 22:00
Late Evening	22:00 – 24:00

Day of week is the normal week: Monday through Sunday.

13. Vehicle of Interest, Person of Interest, and medical patient tags

Call centre / admin fill these in on the full form. Patrollers **see** them on the phone so they know what to look for.

13.1 Vehicle of Interest fields

Field	How it is captured
Colour	Choose from: Black, White, Silver, Grey, Red, Blue, Green, Yellow, Orange, Brown, Gold, Maroon, Other
Shape	Choose from: Sedan, Hatchback, SUV / 4x4, Bakkie / Truck, Van / Minibus, Motorcycle, Bus, Other
Make	Typed (for example Toyota). Previous makes can be reused.
Model	Typed (for example Hilux).
Registration	Typed in capitals.
Distinguishing features	Free text (canopy, smash-and-grab film, spare wheel, and so on).

13.2 Person of Interest fields

Field	How it is captured
Gender	Male · Female · Unknown
Clothing description	Free text
Direction of travel	Free text (for example "south on Ben Viljoen")

13.3 Tags (optional extra flags)

The injury tags describe **the person**, not the incident type and not the danger of the scene. You can have more than one injured person with different tags on the same accident.

Tag	Meaning
Injuries - P1	That person: Code Red — critical / life and death
Injuries - P2	That person: Code Yellow — hurt but not critical
Injuries - P3	That person: Code Green — walking wounded / stable
Injuries - P4	That person: Code Blue — deceased
Remote Jamming	Remote / key jamming suspected
Gate Motor	Gate motor involved
Cable Theft	Flag even if the main type is something else
Beams	Beams triggered / damaged
Bicycle	Bicycle involved

14. Photos

Each incident can have one or more photos. This is required as **proof** (scene, vehicle, open gate, injuries context, and so on).

- Call centre and patrollers can both add photos.
- Photos stay with that OB number and are not public on the internet.
- They are stored securely (Cloudflare R2). The free allowance is large enough for normal sector use (about 10 GB per month included).

15. Patrollers — log and respond while on patrol

A patroller must be able to put something in the book without first going back to the office, and without standing down.

15.1 Log a new incident

From Home, or from the live patrol screen. Typical examples: they come across an **open gate**, or they walk into a house breaking while already patrolling.

On the phone they fill in a short form: type, time (defaults to now), suburb, street (GPS can help), description, photos. "Received from" defaults to CPF Patroller. Their call sign and sector are filled in automatically.

15.2 Respond to an incident that is already open

If the call centre (or another member) already logged it, the patroller can tap **Responding** and choose that active incident. If the type is **Leave to police**, the phone must warn them not to approach — that incident is for SAPS and armed response.

- The patrol does **not** end.
- The live map will show that unit as **Responding** (this patrol type already exists when starting a patrol; now they can switch to it mid-shift).
- When they are done they **resume** the original patrol type (foot, vehicle, and so on).

They can also start a patrol already as Responding, but they must then link or create the incident.

16. Call centre — Commence Shift in the book

In Sierra 1, "Commence Shift" is often written as a row in the OB Book. In Patrol Log, commencing a *patrol* is already a separate action for patrollers.

For a member whose role is **call centre agent**, there will be an optional button: **Log Commence Shift**. That creates one Other / Commence Shift entry (sector, call sign, time). It is not created automatically when a patroller starts a patrol.

17. BOLOs — last seen where and when

When admin or call centre captures a BOLO, Vehicle of Interest or Person of Interest, patrollers must be able to look it up on the phone.

Each item on that list shows:

- What to look for (type, description, vehicle and/or person details)
- **Where last seen** (suburb and street)
- **When last seen** (date and time)
- Photos if any

If a patroller sees that vehicle or person, they can add a short “seen here now” update. That becomes the new last-seen place and time for everyone else.

18. Hotspots — last month’s crime trends

The live map already has admin-drawn hotspot circles. Those will stay, but they will also be **filled from the book**.

- The system looks at **criminal incidents only** from the last month (for example armed robbery, house breaking, theft, wall jumpers). Accidents, fire, medical and other emergencies do **not** create hotspots.
- Where several crimes cluster in the same area, a hotspot is suggested or updated so patrollers can see last month’s trend.
- Admin can still **amend** every hotspot: add one, move it, change the size or rating, or delete it if the trend is wrong or outdated.
- A hotspot that admin has edited by hand is not blindly overwritten. The trend is shown; a person decides whether to keep the change.

In short: hotspots follow last month’s *crime* pattern, not accidents, and a person can always correct the map.

19. Moving old Sierra 1 records across

There are several thousand existing book entries. They will be brought into the new system after they have been formatted to match this document (same type names, same conclusions, same suburbs).

- Old OB numbers will be kept where possible so history stays searchable.
- Photos from the old system can be attached later if they are available as files.
- We will not guess at types that no longer exist. Anything that does not match this list will be flagged for a person to fix before import.

20. Radio lingo and phonetic alphabet

This is a shared reference for wording in descriptions and radio. It is not a dropdown in the system (except where the same words already appear as types, for example BOLO, MVA, MBA, PVA).

Term	Meaning
BOLO	Be On the Look Out
MVA	Motor Vehicle Accident
MBA	Motorbike Accident
PVA	Pedestrian Vehicle Accident
S1	Sierra 1 (WBS1 call centre)
ETA	Estimated time of arrival
COS	Contact on Scene
SB	Standby (get back to you)
EMS	Emergency Services
Ambo / Bus	Ambulance
SAPS	SA Police Service
TMPD / Metro	Tshwane Metro Police
COT	City of Tshwane services
SC / PSC	Private security company
POI	Person of Interest
VOI	Vehicle of Interest
Reg	Vehicle registration
Sitrep	Situation report
Copy	Message received
Mobile / En route	On the way
On Scene	Arrived at the scene
Standing Down	Leaving scene / stopping patrol

Phonetic alphabet

A Alpha · B Bravo · C Charlie · D Delta · E Echo · F Foxtrot · G Golf · H Hotel · I India · J Juliet · K Kilo · L Lima · M Mike · N November · O Oscar · P Pappa · Q Quebec · R Romeo · S Sierra · T Tango · U Uniform · V Victor · W Whiskey · X Xray · Y Yankee · Z Zulu

21. Fields on the capture form (checklist)

This is the full form the call centre will see. Patrollers see a shorter version of the same fields.

Section	Fields	Phone (patroller)
Header	OB number (given on save), Status, Sector, Call sign	Filled automatically
Incident	Category, Type (danger level shows automatically on criminal types), Date, Estimated hour and minutes, Received from	Yes (received from defaults). Danger level shown so they know whether to attend.
Location	Suburb, Street no. & name / complex, map pin	Yes (GPS can help)
Description	Description / summary	Yes
VOI / POI / tags	Vehicle and person details; medical patient tags if someone was hurt	View on BOLO list; injury tags if they logged a medical / accident
Action taken	Services on scene, details, SAPS / Metro / Fire / Ambulance references	Optional
Photos	One or more photos	Yes
Close	Conclusion (required to close)	Optional if they close on scene

Document control: this PDF is the business specification. Later list changes (new suburb, new security company) can be done in admin without a new PDF, unless a type is added or renamed, or a danger level is changed.
